ERIN VENTURES INC.

REPORT AND CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2004 and 2003

TERRY AMISANO LTD. KEVIN HANSON, CA

AUDITORS' REPORT

To the Shareholders, Erin Ventures Inc.

We have audited the consolidated balance sheets of Erin Ventures Inc. as at June 30, 2004 and 2003 and the consolidated statements of loss and deficit and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at June 30, 2004 and 2003 and the results of its operations and its cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

ERIN VENTURES INC. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS June 30, 2004 and 2003

Note 1 Nature and Continuance of Operations

The Company is a development stage public company whose shares trade on the TSX Venture Exchange. The Company is in the process of exploring its resource properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. The recoverability of amounts shown for resource properties and related deferred exploration and development expenditures are dependent upon the discovery of economically recoverable reserves and confirmation of the Company's interest in the underlying resource property claims, the Company's ability to complete the development of the properties and upon future profitable production or proceeds from the disposition thereof.

These financial statements have been prepared on a going concern basis. The Company has a working capital deficiency of \$402,928 as at June 30, 2004, has yet to achieve profitable operations and has accumulated losses of \$8,363,807 since inception. The Company's ability to continue as a going concern is dependent upon the ability of the Company to generate profitable operations in the future and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. The outcome of these matters cannot be predicted with any certainty at this time. The Company historically satisfies its capital needs primarily by issuing equity securities. These financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that may be necessary should the Company be unable to continue as a going concern.

Note 2 <u>Summary of Significant Accounting Policies</u>

These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in Canada and are stated in Canadian dollars. Because a precise determination of many assets and liabilities is dependent upon future events, the preparation of financial statements for a period necessarily involves the use of estimates which have been made using careful judgement. Actual results may differ from these estimates.

The financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized below:

(a) Principles of Consolidation

The financial statements include the accounts of the Company and its wholly owned subsidiaries 766072 Alberta Inc. and Balkan Gold Corp. Balkan Gold Corp. was incorporated in Serbia during the year ended June 30, 2004 for the purposes of complying with Serbian regulatory requirements related to the Piskanja property (Note 6) and has no other assets or operations. All inter-company transactions and balances have been eliminated.

Note 2 <u>Summary of Significant Accounting Policies</u> – (cont'd)

(b) Capital Assets

Capital assets are recorded at cost. Amortization is provided for using the declining balance method at the following annual rates:

Office equipment	20%	Declining balance
Computer equipment	30%	Declining balance

Additions during the year are amortized at one half annual rates.

(c) <u>Resource Properties</u>

The Company defers the cost of acquiring, maintaining its interest, exploring and developing mineral properties until such time as the properties are placed into production, abandoned, sold or considered to be impaired in value. Costs of producing properties will be amortized on a unit of production basis and costs of abandoned properties are written-off. Proceeds received on the sale of interests in mineral properties are credited to the carrying value of the mineral properties, with any excess included in operations. Write-downs due to impairment in value are charged to operations

The Company is in the process of exploring and developing its mineral properties and has not yet determined the amount of reserves available. Management reviews the carrying value of mineral properties on a periodic basis and will recognize impairment in value based upon current exploration results, the prospect of further work being carried out by the Company, the assessment of future probability of profitable revenues from the property or from the sale of the property. Amounts shown for properties represent costs incurred net of write-downs and recoveries, and are not intended to represent present or future values.

(d) Government Assistance

Refundable mining tax credits are recorded in the accounts when there is reasonable assurance that the Company has complied with, and will continue to comply with, all conditions needed to receive the credits. These non-repayable mining credits are earned in respect to exploration costs incurred in British Columbia, Canada and are recorded as a reduction of the related exploration expenditures.

(e) Foreign Currency Translation

Monetary assets and liabilities expressed in foreign currencies are translated at rates of exchange in effect at the end of the year. Non-monetary items are translated at historical exchange rates. Revenue and expense items are translated at the rates in effect at the dates on which such items are recognized during the year. Exchange gains and losses arising from translation are included in income during the year.

Note 2 <u>Summary of Significant Accounting Policies</u> - (cont'd)

(f) Basic and Diluted

Basic earnings per share are computed by dividing the loss for the year by the weighted average number of common shares outstanding during the year. Diluted earnings per share reflect the potential dilution that could occur if potentially dilutive securities were exercised or converted to common stock. The dilutive effect of options and warrants and their equivalent is computed by application of the treasury stock method and the effect of convertible securities by the "if converted" method. Fully diluted amounts are not presented when the effect of the computations are anti-dilutive due to the losses incurred. Accordingly, there is no difference in the amounts presented for basic and diluted loss per share.

(g) Financial Instruments

The Company's financial instruments consist of cash, accounts payable, advance payable and note payable. The fair value of the financial instruments is considered to be equal to the carrying value due to the short-term maturities. It is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments.

(h) Stock-based Compensation

The Company has a stock-based compensation plan as disclosed in Note 9, whereby stock options are granted in accordance with the policies of regulatory authorities. The Company applied the "settlement method" of accounting for stock-based compensation awards. No compensation expense is recognized for those options when issued to employees and directors. Any consideration paid by employees and directors upon exercise of stock options is credited to share capital.

Effective for awards granted after July 1, 2002 all stock based payments to nonemployees and direct awards of stock to employees are accounted for using a fair value based method of accounting. No compensation expense is recorded on stock options granted to employees and directors provided that additional pro forma information is disclosed. Effective for fiscal years beginning on or after January 1, 2004 pro forma disclosure only will no longer be permitted and the fair value of all stock options granted must be accounted for. The Company will adopt the new policy effective July 1, 2004 which will be applied retroactively to July 1, 2002.

Note 2 <u>Summary of Significant Accounting Policies</u> – (cont'd)

(i) <u>Long-term Investment</u>

The Company follows the cost method of accounting for investments where the Company's interest is less than 20%. The carrying cost will be written down where a permanent impairment, as determined by management, has occurred.

Piskanja Borate Property

The Piskanja borate property is located in the Ibar region of the Republic of Serbia ("Serbia"). The Company entered into a joint venture agreement dated October 4, 1996 whereby the Company can earn a 50% interest in the property through direct exploration expenditures (drilling and testing) totalling \$2,670,000 to conduct a research and reserves study leading to the preparation of a feasibility study. Upon determination that the feasibility study would be undertaken, the Company and its joint venture partner would each own 50% of the joint venture and each contribute 50% to all further expenditures. As at June 30, 2004, the cumulative total of direct exploration expenditures of \$2,670,000 has not been completed.

Effective with the year ended June 30, 2001 all costs with respect to the property are being written-off pending obtaining acceptable agreements for mining concessions from the Serbian government.

The Company submitted a formal application for a mining concession covering the Jarandol basin region in Serbia, for the exploration and exploitation rights to boron. This concession application was intended to replace the original joint venture agreement that was signed in 1997. This new proposal was submitted by the Company only after extensive consultation with the appropriate Serbian government authorities, and is in accordance with the recently enacted Serbian concession law as it pertains to mining, the environment, foreign ownership, and other laws and considerations.

The Company entered into an agreement dated April 18, 2003 and amended May 26, 2003 to execute a development plan for the exploration and exploitation of boron deposits in the Jarandol Basin in the Republic of Serbia. A retainer fee is payable to a maximum of US \$60,000 (paid) or until the successful grant of concession rights. The retainer fee paid is an advance against US \$100,000 to be paid upon the successful grant of concession rights.

Note 6 <u>Resource Properties</u> – Note 10 – (cont'd)

Stope Baby Mineral Claims

The Stope Baby mineral claims are comprised of 36 mineral claims located in the Cariboo Mining District of British Columbia. Pursuant to an option agreement dated February 28, 2000 and amended January 21, 2001 and March 12, 2002, the Company earned a 25% interest in the claims for consideration paid of \$75,000 cash and the issue of 30,303 common shares of the Company.

In order to acquire the remaining 75% interest in the property, the Company was required to make total exploration expenditures on the property as follows:

Date	Expenditures <u>Required</u>	Additional Interest <u>Earned</u>
March 31, 2003	\$ 40,000 (incurred)	5%
March 31, 2004	100,000	10%
March 31, 2005	200,000	20%
March 31, 2006	410,000	40%
	\$ 750,000	75%

As at June 30, 2004, the Company had earned a 30% interest in the claims. The Company is in default of the terms of the agreement in respect of the option to acquire the remaining 70% interest.
